Professional Summary

B.Tech Computer Science & Engineering graduate (2026) with hands-on experience in Full Stack Web Development using Python, Flask, JavaScript, HTML5, and CSS3, specializing in RESTful API design, integration, and deployment. Proficient in SQL database design, Git version control, and Object-Oriented Programming, with applied exposure to Machine Learning model development, Generative AI, prompt engineering, and workflow automation using n8n.

Education

Vaagdevi Engineering College, Warangal (JNTUH) <i>B.Tech, Computer Science & Engineering — CGPA: 7.9 / 10, Warangal, Telangana</i>	2026
SVS Group of Institutions, Hanamkonda (SBTET) <i>Diploma, Computer Science & Engineering — CGPA: 9.3 / 10, Hanamkonda, Telangana</i>	2023
Vishwa Bharathi High School, Ramagundam <i>SSC (Secondary School Certificate) — CGPA: 10.0 / 10, Ramagundam, Telangana</i>	2020

Technical Skills

Programming Languages: Python, JavaScript, SQL, HTML5, CSS3

Frameworks & Libraries: Flask, RESTful API Development

Databases: SQL, MySQL

Tools & Version Control: Git, GitHub

Cloud & DevOps: Cloud Computing, Cloud Deployment

AI / Machine Learning: Generative AI, Prompt Engineering

Projects

Edge-Enabled Diagnostic Engine with Homomorphic Encryption <i>Python, Flask, Scikit-learn, REST API, SQL, Homomorphic Encryption, Git</i>	2026
- Built a full stack healthcare Machine Learning application to diagnose heart disease and hypothyroidism in real time from patient data, processing 1,000+ patient records. - Developed and deployed a RESTful API backend using Flask with feature engineering, model evaluation, and hyperparameter tuning, improving diagnostic accuracy by approximately 15%. - Integrated Homomorphic Encryption into the Machine Learning pipeline to secure patient data end-to-end without degrading model performance, ensuring HIPAA-aligned data privacy.	
Travel Itinerary Planner <i>Python, Flask, JavaScript, HTML5, CSS3, REST APIs, JSON</i>	2025
- Built a full stack web application integrating 3 live RESTful APIs for real-time flight, weather, and hotel data, achieving sub-2-second response times. - Implemented real-time booking workflows handling concurrent API calls and JSON data synchronization across multiple third-party services. - Built responsive, mobile-friendly front-end components using HTML5, CSS3, and JavaScript, connected to a Python Flask backend via RESTful endpoints.	

Certifications

- AWS Certified Cloud Practitioner — Amazon Web Services
- Data Analytics Job Simulation — Deloitte (Forage)
- Introduction to Artificial Intelligence — Cisco Networking Academy
- Prompt Engineering with ChatGPT — SimpliLearn

Activities & Achievements

- Won a school-level Kabaddi competition as part of a 7-member team, demonstrating teamwork and sportsmanship.
- Served as a Team Coordinator, coordinating 7 team members during school-level sports activities.
- Participated in a College Level Hackathon, demonstrating Generative AI skills.
- Participated in technical workshops and coding activities, improving problem-solving and teamwork skills.
